

Optimise and automate your organisation

**Kelio Planning Advanced provides an efficient tool for creating your employee schedules and managing the workload of your staff.**

Planning employees and jobs

## Secure your schedules

- . Checks on job title and skills
- . Customisable anomalies and alerts
- . Monitoring of indicators and fairness

## Automate your planning

- . Requirements calculated in line with criteria
- . Automatic planning suggestions
- . Planning validation

## Control your costs

- . Monitoring of premium hours and bonuses
- . Control the use of temporary workers

## Maintain your workload

- . Monitoring of suitable ratio between load / requirement
- . Under-staffing identified

## Tailor-made interface

- . Scale by the day, half-day or by the minute
- . Jobs adapted to suit your organisation

## Share your schedules

- . Printing and exports
- . Email & SMS Alerts

Thanks to the automatic planning suggestions, I have improved the way my production is organised and I now adhere more closely to my target objectives.

**Karine R.**  
Production Manager

Thanks to Kelio, I have the added assurance that my schedules adhere correctly to legal constraints.

**Nicolas S.**  
Human Resources Manager

Job planning opened in days

Job planning by the hour

## + Kelio's benefits

- A fully web-based planning
- Quick-access, grouped actions: drag & drop, copy & paste and planning templates
- Pre-filled planning using work cycles (weekly schedules and shift schedules)
- Flexible planning scale: by day, half-day, hour or even by minute
- Create as many schedules as you need in order to test different scenarios
- Rapidly identify those employees yet to be planned
- Validate the planning to lock your data
