

## CHALLS CLEANS UP WITH INTERACTIVE TIME AND ATTENDANCE SYSTEM

### SUMMARY

#### Overview

*Industry:* Manufacturing

*Solution:* Kelio Visio X7 terminals supported by Kelio Pro software

#### Benefits

- Automatic clocking in and out with photographic proximity cards eliminates manual time sheets.
- Real time reporting means managers are aware of any absences immediately so can arrange cover.
- Linked to door entry system so same card used to permit or restrict access to different parts of site.

Founded in 1990, Challs has been developing household cleaning products for 25 years, with an ever-growing portfolio of leading and innovative brands. With over 50 staff, finance director Marlini Finney explains why she approached Bodet to automate their employee attendance system.

### What was the challenge you were looking to overcome?

*"When we first started employing staff, we used a simple paper-based system to record attendance. This worked well, but as the business expanded and the workforce grew, it became more time consuming and quite a burden for the HR and payroll staff. Our move to new headquarters was the spur we needed to actually do something about it."*

### What system was installed?

*"Having researched the available systems, we decided on Bodet's Kelio software for its flexibility and ability to export attendance data for payroll software, along with the Kelio Visio X7 terminals for their stylish appearance and ease of use. Kelio is a modular system, so additional functionality such as self-service and staff planning can be added as the business continues to grow."*

### What have you found are the benefits of the system?

*"Automating time and attendance has been a great success. No more manual time sheets which saves time and ensures the data is accurate. As attendance data can be extracted from the Time & Attendance System for quick and easy import into our payroll software, it eliminates duplicate data entry so there is no risk of manual entry errors. The software also generates real time staff attendance reports which can be accessed at the press of a button. The system also links with the door entry system, so the same proximity cards are used for both clocking in and out and gaining access to different parts of the building. The Kelio Visio X7 system has been well received by all the staff, saving time and providing valuable management information to help us improve efficiency and grow the business."*

### About Bodet Limited

Bodet has provided clocks, class change, PA and Time and Attendance solutions for over 25 years.

This devotion to constant improvement has enabled Bodet to become the European leader in its sector.
